EXAMINER'S AMENDMENT

1. The drawings were received on September 05, 2007. These drawings are acceptable.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 4, lines 8 and 9, the terms "a received signal" and "a spread code" have been changed to "the received signal" and "the spread code", respectively for clarity because the preamble of claim 4 has been amended to include the terms "a received signal" and "a spread code".

3. The following is an examiner's statement of reasons for allowance: the prior art fails to show or suggest a communication device for demodulating a received signal by a spread code comprising an acquisition unit for performing a search (timing acquisition) of at least the received signal based on a reference signal of an oscillator, a tracking unit for performing tracking processing of the received signal based on the reference signal of the oscillator, and a control unit for determining a stable time area based on change information of the oscillation frequency of the oscillator and making the acquisition unit perform the search processing in the determined time area.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
